Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed the newly submitted claim 20 to overcome the 112 rejection and discussed the claim 1 what the chuck is in the claimed invention. The examiner's position is that there is no structural difference between the prior art and the claimed invention for the chuck in claim. Even though the function of the chuck is specified in the specification, it has to be recited in the claim for consideration. Examiner noted that an amendment could be made incorporating features of dependent claim 2 into the independent claim, then the claimed invention appears to be allowable.
